

# SUDDEN MILITARIZATION OF NATO

Statistics show that NATO is being suddenly militarized. NATO has increased its budget and arsenal, we can see a sudden rise in the expenditure of NATO countries in the militaries in 2019. For most countries there is a big difference from 2018.

#### Defense Expenditure of every NATO country

Not only that, it seems that NATO suddenly equips each country, even the smallest ones that are not usually regarded as military powers, for example Albania received out of the blue 3 uh 60 blackhawk helicopters with 3 more to come.

Also some weirds moves are happening one of those being the reception of the Patriot missile system in Romania becoming the first country in the Black sea region to have one.

Furthermore the conflict and the sudden rise of tensions between Greece and Turkey cannot be ignored. Both of the countries seem to militarize quickly and Greece even considers compulsory military service at the age of 18 and for one year (currently it is for 9 months). While it is known that Turkey has vastly increased its budget and arsenal and has started programs like the vision 2033 and many others.
